ABDULLAH MOHAMED

Software Engineer — Full-Stack

Cairo, Egypt · abdullahmahbob07@gmail.com · github.com/AbdullahM07 · linkedin.com/in/3bs7

PROFESSIONAL SUMMARY

Full-stack software engineer at Oblien (Cairo) who ships complete products rather than single layers of them — React front ends, Node.js/Express services, MongoDB and PostgreSQL data layers, Docker and CI deployment. Five systems built or co-built are running in production today, from a self-hosted deployment platform to a bilingual clinic-management workspace. Comfortable across the whole request lifecycle, including Arabic/English product surfaces.

WORK EXPERIENCE

Software Engineer

Oblien — Cairo, Egypt

- Build **Openship**, a self-hosted deployment platform in TypeScript and Docker: teams push code and it ships itself — builds, releases, rollbacks on their own hardware (openship.io).
- Engineer **ClinicAI**, a bilingual (Arabic/English) clinic-management workspace spanning web, admin dashboard and Expo mobile: appointments, prescriptions, finance, branches, team access, and per-clinic WhatsApp messaging via Twilio.
- Build **Mindwire**, an SDK that lets product teams ship AI features on production-grade agent harnesses without rebuilding the agent loop (mindwire.sh).

SELECTED INDEPENDENT PROJECTS

Masroof — Personal Finance Manager

React · cloud sync — live at masroof-navy.vercel.app

- Income, expenses, budgets, subscriptions, accounts and savings goals in one place, with sign-in and cross-device cloud sync.

WatchLink — Watch-Together Platform

TypeScript · WebRTC — live at watch-link-web.vercel.app

- Real-time synchronized playback across participants, with chat, reactions, shared notes and push-to-talk voice rooms over WebRTC.

EDUCATION

B.Sc. Computer Science

Suez Canal University

- Graduate profile: systems, databases and software engineering coursework applied directly across shipped production systems.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, Next.js, Tailwind CSS, HTML/CSS

Backend: Node.js, Express, MongoDB, PostgreSQL, REST APIs

Tooling: Git, Docker, Linux, Vercel, GitHub Actions
